

Stool Lid Gas Strut
245mm
100N

The inside fixing
should be placed
30mm down from
the edge and
240mm from the
back of the box.

Measurement A:
The fixing on the lid
should be placed
100mm away from
the hinged edge of
the lid.

80 degree angle
(approx)

Measurement B:
The fixing should be placed 3mm from the near
side edge (plus wood thickness).
In this example, the wood is 18mm thick,
making the total distance from the edge 21mm.
